PROFILE

Full-stack developer with over two years of experience in full-cycle development, QA testing, AI integration, and cross-team collaboration. Capable of delivering clean, scalable results and communicating effectively with both technical and non-technical stakeholders. I consistently adapt to evolving project requirements and modern technologies to ensure high-quality, future-ready solutions.

TECHNICAL SKILLS

React | Laravel | MVC Architecture | MySQL | Laravel Filament | Redux | UI/UX Design | Figma | Bootstrap | Tailwind | TypeScript | React Native | Express.js | GitHub | Docker | cPanel | Postman | Agile/Scrum | Perplexity AI | OpenAI | API Integration | AI Integration | Eloquent ORM | Vercel

PROFESSIONAL EXPERIENCE

JUNIOR SOFTWARE DEVELOPER | Stratedia | Mystic, Connecticut, United States   Feb 2025 – Oct 2025

- Developed full-cycle application modernization using Laravel and React, boosting backend efficiency by 12% through optimized API design and use of AJAX principles.
- Integrated AI and managed cPanel deployments to establish scalable automation and ensure consistent, stable releases.
- Enforced GitHub version control and collaborated with expert teams, accelerating feature delivery timelines by 20% and maintaining consistent code quality.
- Designed and implemented a complex Notification feature with conditional rendering logic, ensuring distinct and personalized functionality based on individual user roles.
- Engineered and designed a dynamic Notes feature using AJAX to achieve seamless, asynchronous data rendering, thereby eliminating page reloads and significantly improving user workflow efficiency.

JUNIOR SOFTWARE ENGINEER | Exocoder, Inc. | Kabankalan, Negros Occidental, Philippines   Jul 2024 – Jan 2025

- Architected and delivered responsive, high-performance user interfaces for a city-wide delivery application using React and Laravel.
- Coordinated daily sprints and tracked deadlines, resulting in a quantifiable improvement in team communication and delivery consistency.
- Engineered scalable mobile features for the Petcheckr application using React Native, leveraging advanced state management, routing, and developing custom components, significantly enhancing user functionality and interface performance.
- Streamlined administrative workflows and CRUD operations by implementing Laravel Filament, significantly improving the efficiency of the admin panel.
- Supported core backend operations, gaining hands-on expertise in API integration and application deployment processes.

QA TESTER INTERN | NOAH Business Applications | Makati, NCR, Philippines   Mar 2024 – Jun 2024

- Conducted comprehensive QA testing across multiple platforms, enabling the early identification of defects and ensuring the seamless integration of new features.
- Executed detailed test plans and maintained strict documentation (test cases, results, and bug reports) using Google Sheets and Docs, ensuring 99% accuracy in tracking and reporting.
- Coordinated daily review calls via Zoom, a key action that improved team alignment and accelerated issue resolution across the development cycle.

EDUCATION

BACHELOR'S DEGREE | Information Technology | Southland College   Jul 2020 – Jun 2024
